Xanius Hall

Senior Full-Stack Software Engineer

St. Catherine, Jamaica · (876) 858-3360 · xaniush@gmail.com · LinkedIn

Full-stack engineer with 10+ years of experience building web products with Laravel, PHP, and Vue.js. Builds customer-facing features, staff workflows, and payment integrations.

EXPERIENCE

Software Engineer | Appfinity Technologies — Apr 2018 – Present

St. Thomas Municipal Corporation

- Built multi-step applications with conditional fields, uploads, and drafts, plus a resident timeline to track progress, submit requested documents, and download receipts.
- Built a role-based review editor and preserved the assigned workflow on active applications. Integrated PowerTranz and built recurring billing.

Iteneri

- Built ticketing and PowerTranz payments for a platform that has supported 350+ events. Used Laravel Cache Locks to prevent overselling and queued attendee emails and spreadsheet imports.
- Built an AI livestream support agent that answers questions using event schedules and FAQs. Helped add live chat and polls with Laravel Reverb.

NyamBox

- Integrated PowerTranz with 3-D Secure and built a payment-status fallback for failed checkout redirects. Built order history and tools for weekly basket planning and fulfilment.
- **Other Appfinity work:** Integrated PowerTranz for JBDC's learning platform and Knowledge Bank; deployed and maintained production apps with Laravel Forge and Laravel Cloud.

Junior Software Developer | LoanCirrus — Apr 2016 – Dec 2017

- Built Laravel, PHP, and MySQL features and fixed defects with senior engineers on an Agile team.

INDEPENDENT PROJECT

Myers Legacy | Independent Full-Stack Developer

Built local inventory management, import search, a duty estimator, and WhatsApp enquiry tracking. Served stored vehicle details first to reduce repeat requests to the supplier.

TECHNICAL SKILLS

Backend & data: PHP, Laravel, REST APIs, MySQL, PostgreSQL
Frontend: JavaScript, TypeScript, Vue.js, Inertia.js, Nuxt, React.js, Next.js, Pinia, Tailwind CSS
